

# Save the World with Soap<sub>2</sub>o

by washing your hands sustainably

I'm Soapy and  
i'm here to teach  
you about how using  
Soap<sub>2</sub>o to wash your  
hands is helping  
to look after the  
planet!

# Soap<sub>2</sub>O... Saving the World!

Hi, I'm Soapy, and I'm going to teach you all about the benefits of using me to wash your hands!

But first, a fun fact about me; I'm actually made from recycled plastic! Did you know lots of types of plastic can be recycled and reused?

Can you tell me about how you help recycle plastic at home? What sorts of plastic do you recycle?

# Did you know...

For a long, long time we have been sending used plastic bottles to landfill. Which isn't very environmentally friendly because plastic can take **450 years to break down – WOW!**

So we invented Soap<sub>2</sub>o to stop plastic going to landfill. In fact, **no plastic from Soap<sub>2</sub>o goes to landfill, ever!**

Soap<sub>2</sub>o have saved

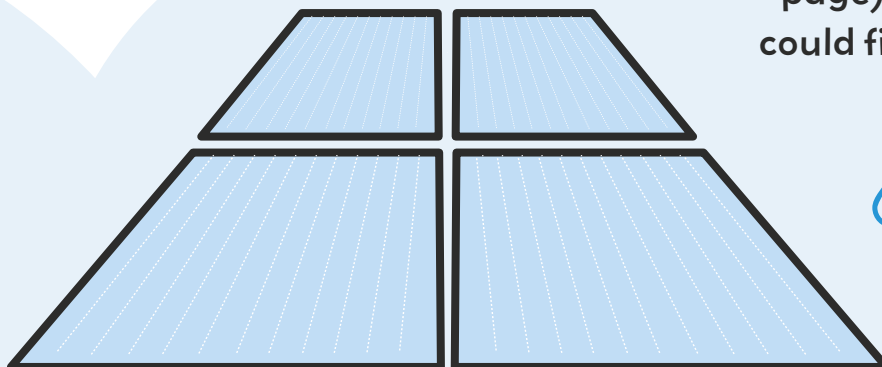

## 25 tonnes

**of plastic from going to landfill!**

25 tonnes is about as heavy as 3 T-Rexes! That's a lot!

And they've donated **10 million litres of water to Made Blue** (you can find out more about Made Blue in your poster on the next page), that much water could fill 4 Olympic sized swimming pools!

 **MADE BLUE**

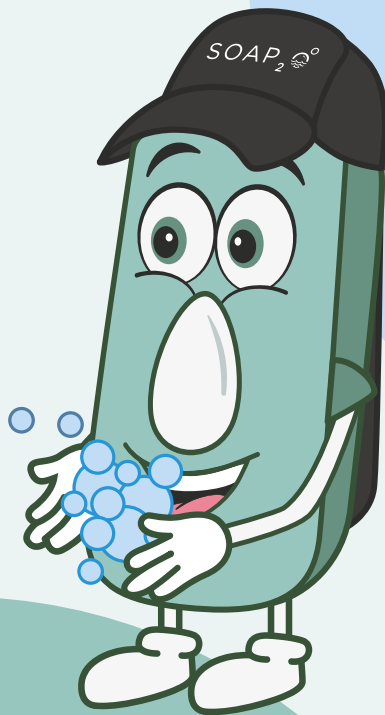

# Time to save the World!

# 10 million litres

Each time you wash your hands with Soap<sub>2</sub>o, you're helping to give another child access to clean, safe water!

**Thank you!**

In 2022 Soap<sub>2</sub>o users, just like you, helped us donate 10 million litres of water. And we want to donate even more in 2023, can you help us? All you have to do is wash your hands with Soap<sub>2</sub>o!

The water we donate helps children in other countries to stay safe and healthy. The Made Blue Foundation brings fresh water to children so they can...

-  cook
-  wash
-  drink
-  clean

## Other cool ways to save the World...

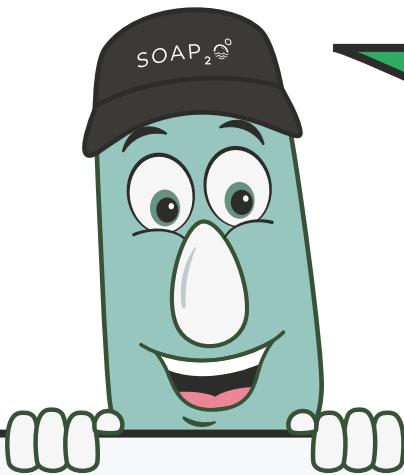

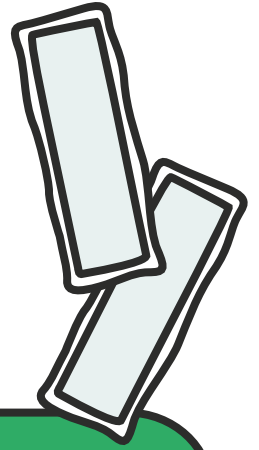

-  Recycle plastic, metal, glass, card and paper
-  Walk or cycle to school instead of using the car
-  Plant more wild flowers for the bees
-  Take part in a litter pick
-  Raise money for your favourite eco-charity
-  Swap or share your books and toys

 **MADE BLUE**

I'm a poster, pin me up!

# Learning about how Soap<sub>2</sub>o works

This is how Soap<sub>2</sub>o helps to save our planet

- Dispensers, like me, are made from 100% recycled plastic
- We never, ever use single use plastic
- We don't add water to our soap, adding water means the soap is heavier to transport and uses more fuel to power the delivery lorries
- Your school adds the water to Soap<sub>2</sub>o soap when it arrives at your school, here's how...

## Fill, add, shake + go!

1

Fill the 4L bottle with water to the line

2

Add a 4 x 10g sachets to the bottle

3

Screw on the lid and shake the bottle

4

Settle for 10 minutes and shake again before first use

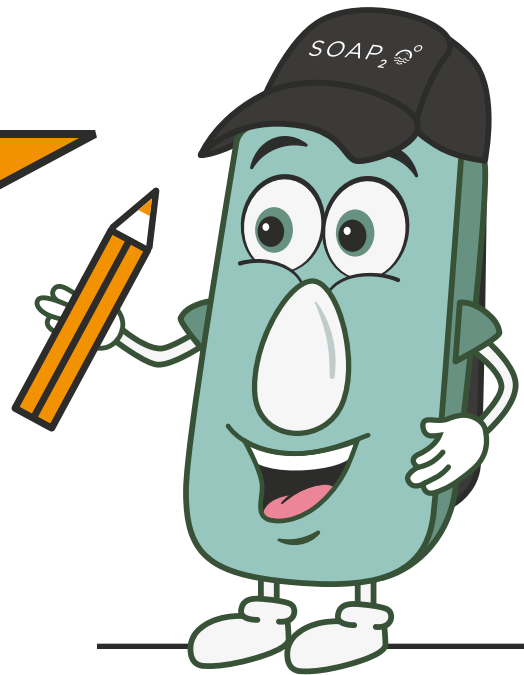

5

Pour into dispensing unit as required

# Wordsearch

Now that you know all about Soap<sub>2</sub>o, you're a hand-washing, plastic-saving, recycling pro!

Let's look for some of my favourite words in this word search! Can you find them all?
