Important Numbers.

Important numbers

Vibe Pro vs **100ml aerosol**

Fragrance content

- **100ml** vs **6.8ml**
 - **14** times more fragrance

Molecule size

- **8 microns** vs **80 microns**
 - **10** times smaller

«vibe»[®]
PRO

Advantages of

14 x more fragrance

vs

Smaller particles

Hangs in the air longer

Refill lockout feature

No propellants

*4x quantity per pallet

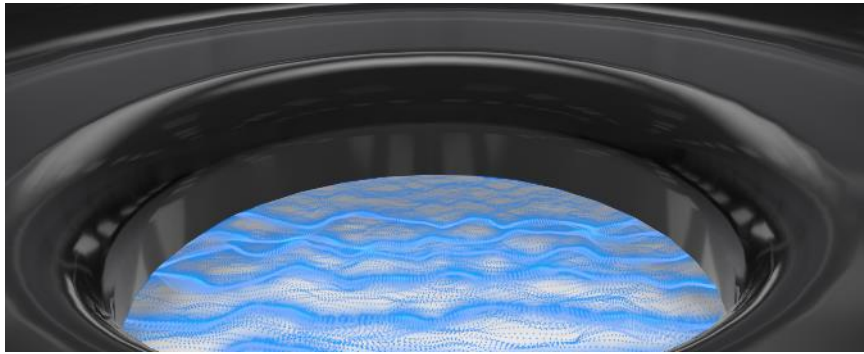

*compared to a 270ml aerosols

Advantages versus aerosols

Vibe Pro		Aerosol		Vibe Pro Advantages
No Gas or propellants	Uses Gas and propellants	Non-flammable safer to store transport and use.		
8 micron molecules delivery	80 micron molecules delivery	Hangs in the air for several hours. Creates layers of fragrance		
90-day service option	Usually serviced every 30 days	Less service costs.		
4 refills per annum	12 aerosols per annum	Less disposal of used refills.		
Refills 100% recyclable after use	Impossible to recycle go to landfill.	Lower disposal cost and better for the environment.		
Covers up to 510m3 from a single unit	Would need 4-5 units to cover same are.	Less service costs, less refills,		
0.04ml identical sprays	Between 0.03ml – 0.09ml per spray	Better longer lasting performance from smaller dose size		

NEXT-LEVEL AIRCARE

Patented Vibrating Mesh Technology

- 2,000 laser-cut holes deliver ultra-fine mist of fragrance
 - Scent hangs in the air longer than aerosols because particles are significantly smaller, providing longer lasting and more consistent scent

Airradicate® Malodour Counteractant

- 2-in-1 fragrance and malodour counteractant
 - Neutralizes odors and freshens space with one product

Fragrances

- Choice of 5 fresh fragrances for in and outside of washroom.
- ICE COOL being launched Q1 2024
- Specially formulated to pass through 2000 laser drilled holes of piezo plate to create ultra-fine mist

Easy to recycle refills

VOC exempt

Non-pressurized
